

PODCAST & LIVE STREAMING

Triton Audio CDN

Robust and reliable global reach for your content on our built-for-audio CDN (Content Delivery Network).

POWER, SCALABILITY & RELIABILITY

With over 25 points of presence, our worldwide content delivery network (CDN) is built and tuned for live and podcast audio delivery, ensuring the most reliable, highest-quality listening experience for your audience.

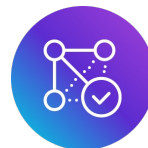

BENEFITS

- More global points of presence than any other streaming audio provider
- Format, codec and media-player agnostic
- Powerful per-listener content replacement capabilities

Redundancy & Undetectable Failover

Built for redundancy so you can rest assured that your audio streams and podcasts are always on.

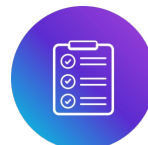

Compatibility

Compatible with a wide range of radio automation systems, including Sam Broadcaster, RCS Zetta, Maestro, Enco DAD, BSI - Symian, and more.

Optimized for Ad Insertion

Our CDN is natively built to work with the Triton Ad Platform (TAP) and SSP, supporting the simplest to the most complex ad insertion needs.

Royalty Reporting

Royalty Reporting toolset is 100% integrated and automated. Different aggregation levels are offered in the format you need (Excel, USA Sound Exchange or Australia PPCA).

Player Widgets and SDK

Our player suite offers a variety of options, from our off-the-shelf widgets to our flexible and powerful SDK. Our solutions are built to deliver a high-quality listening experience for your audience, while minimizing the complexity on the player side.
