

# ACCESS TO A BRAND SUITABLE ENVIRONMENT

Contextual Targeting For Podcasting

# Unlock The Power Of Advanced Brand Suitability And Contextual Targeting With Sounder

What makes Sounder's tool unique?

01

**Constant Learning:** Stays current with evolving language and adapts to new uses of words and phrases

02

**Dynamic Classification:** Direct integration With Triton Digital Ad Serving and Programmatic platform

03

**Contextual Understanding:** Evaluates the context and tone of podcast audio, not just keywords

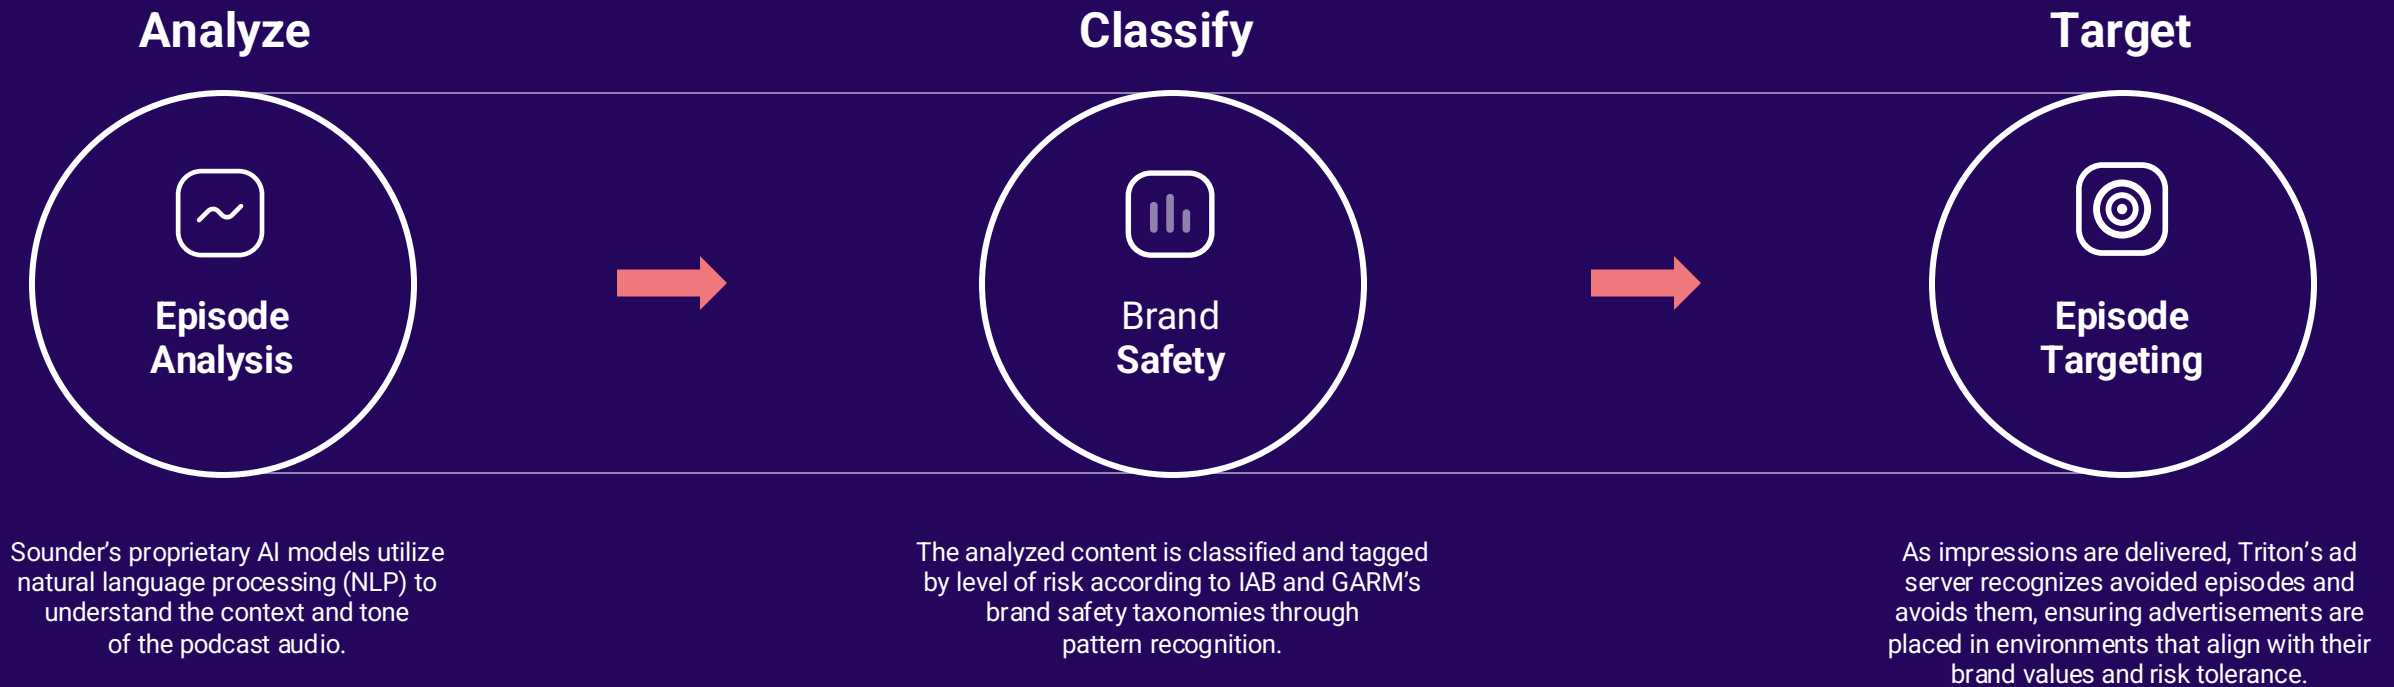

04

**Precision:** Episode level targeting beyond just the show

05

**Proactive Filtering:** Evaluates content suitability in real time before an ad is served

# How it works For Brand Suitability

## Example

01

A mention of **"she's not dead"** is identified within a conversation about brunch.

02

Based on IAB's and our understanding of context, for the "Death & Injury" category, the episode is classified as "Unrelated/Low Risk."

03

We determine that the episode is safe/low risk for brands concerned about Death & Injury.

# The only **pre-bid solution** for brand suitability and contextual podcast buying

## GO BEYOND KEYWORDS

Sounders proprietary AI and ML systems are purpose built for podcasting, analyzing and understanding the full content and context.

## AIRTIGHT PRE-BID TARGETING

Episodes across shows and networks are analyzed and tagged before content is published. Meaning your ad is only inserted where it should be.

## AUTOMATED POST-CAMPAIGN REPORTING

Eliminate spreadsheets and the need for post-campaign verification and make-goods. Generate and view campaign reporting in real-time.

# Podcast Contextual Targeting

Reach your desired audiences through enhanced content targeting

01

## What it is

- Targeting capability that places ads into podcast episodes that contextually align with specific words and topics that matter to your brand
- AI and natural language processing transcribes episodes to understand the content and place ads accordingly

02

## When to use

- Foster positive association and drive a meaningful connection with your brand through relevant content alignment
- Enhance your targeting strategy by connecting with audiences using specific themes, specific words or topics within episodes

03

## How to use

- Choose from preset contextual targets created using IAB categories or create custom contextual targets
- Focus on broader topics to reach a wider audience
- Contextual targeting should be leveraged in conjunction with audience or network targeting to maximize scale

## Listeners Pay More Attention To Relevant Ads

By understanding podcast content, as well as demographics, contextual targeting ensures your message is relevant and memorable to your audience.

72%

of podcast listeners report paying more attention to ads relevant to the content they're listening to.<sup>1</sup>

73%

of advertisers consider contextual targeting crucial for brand safety in podcasts.<sup>2</sup>

# Buy Audio With Confidence

01

**Gain more control** and precision when choosing the right environments for advertising

02

**Reach more audiences** by aligning with a larger pool of podcast categories and genres you might not have considered otherwise

03

**Optimize your ad spend** by ensuring your marketing dollars are going towards valuable impressions and engagement

04

**Automate brand safety and suitability** through intelligent technology that evolves with time

05

**Leverage IAB's or GARM industry defined and trusted standards** as a baseline to assess level of risk

# Why Sounder Is The Smarter Choice

## Key Befenits for buyers:

01

**No Technical Skills Needed:** Sounder is seamlessly integrated into Triton Digital's world-class ad delivery and programmatic system. Just provide your requirements and let us do the rest.

02

**No Manual Work:** Forget complex Excel spreadsheets and spend less time managing campaigns with multiple conversations and back-and-forth – everything is automated and handled within the platform.

05

**No Daily Monitoring:** Sounder is integrated into the full ad-stack, so you can set and forget – campaigns run effortlessly.

06
